

## STUDENT NEWSLETTER IN THE NEW WEB-SITE

As students and technologists may know we plan to have a regular section for student material, activities and interest. We planned this in order to have a place for students to go to help them with various questions that arise.

Packets have been sent to program directors within the central chapter. The information included will be at least a partial year in advance.

So mark your calendar

Keep in mind to look for Research and Education Award Winners

This is the first run with the new updated website. We feel and hope that we can use this as a more useful tool for all in the central chapter. I ask for your thoughts and suggestions from the students to make this a better tool. All of us associated with this project want and need student input. Those of us on the newsletter committee would welcome student writers, so give us a try.
